MILLER RED RASPBERRY.

HERE is an instance of one of the good things of life which has been kept from the public for some years past, by a few growers who preferred to market the fruit rather than sell the plants. This berry has been fruited in this locality for some ten years past, and would probably have remained in seclusion for as many more, if it had not been brought to public notice by a few enterprising fruit men, who desired that the horticultural world should know more of its good qualities and reap some of the profits thereof. A short description only, is necessary.

The bush is a stout, healthy, vigorous grower, not quite so tall as Cuthbert, rather more stocky and dwarfish. It is well calculated to hold up the immense crops of fruit with which it loads itself.

As compared with Cuthbert and Thompson, growing in the same field, it has never yet shown any signs of winter killing, whilst these have both suffered the past mild winter considerably. Berry is as large as Cuthbert, holding its size to the end of the season, round in shape, color bright red, does not fade, but will hold its color after shipment longer than any other red variety, core very small, does not crumble, making it the firmest and best shipping berry in existence: has not the flat taste of some varieties, but a rich fruity flavor entirely its own. The time of ripening is with the very earliest, the first picking being with Thompson's Early, June 11th, the Miller producing double the quantity of berries at each picking that Thompson's did, in the same field under the same conditions, continuing until August 3d—Thompson having been gone three weeks—fully as prolific as Cuthbert. It does not seem particular as to soil, having been fruited on light sandy, gravelly and heavy clay soils, with equal success. To sum up in conclusion, it possesses the following points of superiority as compared with other varieties:

1st. Ripens with the very earliest.
2d. Productiveness equal to any.
3d. Has no equal as shipper.
4th. Perfectly hardy.
5th. Quality unsurpassed.
6th. Attractive color.

Below will be found a few testimonials from well known horticulturists, commission men and fruit growers, who have seen and handled this berry:

TESTIMONIALS.

U. S. Department of Agriculture.
Division of Pomology, Washington, D. C., July 3, '94.

Dear Sir,— your letter of July 2d describing the Miller Raspberry received, for which, and the berries, accept my thanks.
It has every appearance of being remarkably productive, in fact, your trial with it and Thompson’s Early establishes its fruitfulness; is of a beautiful color which it retains even when berries are crushed in transportation, is of good size, of remarkable firmness and should prove a valuable addition to our list of red raspberries. In quality I consider it superior to Cuthbert.

Yours truly,

S. B. Heiges, Pomologist.

Later.—July 6th.—Since reading your letter of July 4th I am doubly impressed with the merits of the Miller. Mr. Taylor reports as follows: “Resembles Brandywine in general appearance, but is firmer. Its earliness, firmness, productiveness, bright color and good quality combine to make it a very promising variety for market.”

Yours truly,

S. B. Heiges, Pomologist.

Prof. Taylor is assistant U. S. Pomologist.

PARKSLEY, Va., July 13, 1894. Dear Sir.—Your letter of the 2d and the box of the Miller Raspberry came all right. It is indeed a good berry. The size, color and flavor are good, and it is quite firm enough to ship well. I had been to Richmond to see a new raspberry on the grounds of M. T. Thompson not long before your specimens came, and there saw the Thompson (Early Prolific) to which you refer. I think the Miller better, if it bears generally, as it does with you.

Yours sincerely,

H. E. Van Deman, Ex-U. S. Pomologist.

(Orange Judd Co., 52 and 54 Lafayette Place.

NEW YORK, July 11, 1894. Dear Sir.—The berries came to hand this morning and were in very fair condition. It seems like a solid, good colored and good quality fruit of good size. Are you confident that it will outyield the Cuthbert? I should be glad to have the history of the berry—its origin, etc., and if possible, would like two or three plants next spring to test it here. Has it been disseminated? I do not remember to have heard of it before.

Sincerely yours.

F. G. Fowler.

Mr. Fowler was formerly associate editor of the Rural New Yorker, but is now connected with the American Agriculturist.

Office of The Farm Journal.

Editorial Department, Philadelphia, July 3, 1894.

Dear Sir.—We received in good order the little box of Miller Raspberries. They are certainly very large and fine. Have you been informed that we are intending to publish next winter a berry book? It would not be a bad idea for you to have a painting or photograph made of the berry and furnish us with information concerning it.

Yours truly,

Wilmer Atkinson Co.

PHILADELPHIA, July 4, 1894. Dear Sir.—Your letter received. We think without exception you have sent us the finest red raspberries we have handled, and yesterday while all Queens were soft, your Miller was firm and hard.

Smith & Miller, Produce and Commission Merchants.

BROOKLYN, N. Y., July 13, 1894. Dear Sir.—Your raspberry called the Miller is the best raspberry that ever came to this market, for color and size. Their keeping qualities have never been equaled, as I have found that they are as firm after twenty-four hours standing as the general run of raspberries are at picking.

Yours.

PHILADELPHIA, July, 1894. Dear Sir.—The Miller Raspberry, which we have handled for you this season, we consider an excellent berry; surpassed by none in size, flavor and durability in shipping. We would recommend the cultivation of this variety, as it cannot but prove a very profitable undertaking for the grower.

Respectfully,

J. P. MOYER & CO., Wholesale Commission Merchants.

PHILADELPHIA, July 5, 1894. Dear Sir.—The red raspberries we have been handling for you, called the Miller, we have found to give the best satisfaction to our trade of any berry we have handled this season. They have been of good color, very large and firm, and we always had them engaged on arrival. Every one who has bought them of us has praised them very highly and has engaged them ahead. We have always been able to get from two to four cents per quart more for them than any of the other berries we have handled at same time. Wishing you success with your berries, we remain, Yours,

DENNEY & WRIGHT, Commission Merchants.

BRIDGEVILLE, DEL., July 26. 1894. Dear Sir.—I have seen the Miller Raspberry fruiting in a six-acre field side by side with Queen of the Market and Thompson’s Early Prolific. It is as early as Thompson’s, larger than Queen, and the firmest red I ever saw: does not crumble or drop from the bunches it was picked more than three times a week; is firm and all right: holds its color better than any red I ever saw, and the most productive of any, even surpassing the well known Queen. The first picking was on the 11th of June and they are still picking today.

Yours,

GEO. W. WILLIN,
Grower and Dealer in Fruits.

SEAFORD, DEL., July 28, 1894.—I have known the Miller Raspberry for ten years, having seen it when first known here, and recommended it as a splendid berry to the gentleman having it. The berry has now made its own reputation in this section and everyone wants it that is engaged in raspberry culture. The chief characteristics of the plant are that it is a vigorous and hardy grower, a good bearer, earlier than Cuthbert, a splendid shipper, retaining its color and solidity longer than any other red berry, and with our people, has been the most profitable.

E. L. MARTIN,

BRIDGEVILLE, DEL., August 3, 1894.—I am satisfied the Miller Red Raspberry is the most profitable grown. I carefully examined it and other varieties side by side and I consider it, without doubt, more productive and better in every respect. Shipping qualities unsurpassed.

P. L. CANNON,
President First National Bank, Seaford.

BRIDGEVILLE, DEL., August 3, 1894.—It gives me pleasure to write you that the Miller Red Raspberry is fully up to what you told me, and I am sure any one wanting to grow red berries will make no mistake if he buys the Miller; they bear well and sell for good prices.

H. P. CANNON,
Fruit Grower and Canner.

In addition to the above, we may add that the Miller Raspberry has been noticed in the Country Gentleman, American Gardening and National Nurseryman, in the most flattering terms.
Miller Red Raspberry.
